6. Solution

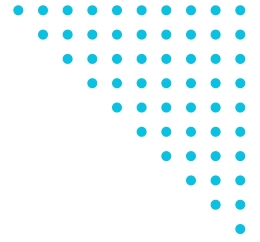

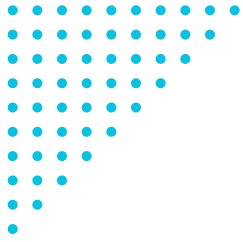

[CASSETTE TAPE/PHONE ORDER]

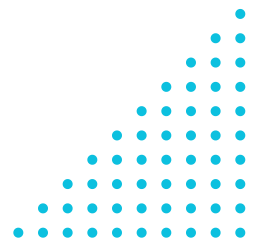

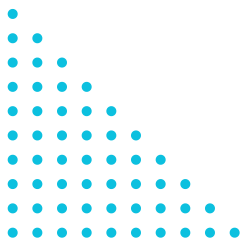

1. You will need the cassette tape, the guest check, and the translation wheel in order to do this puzzle.
2. If you are having trouble knowing where to start, make sure to look at both sides of the cassette tape.
3. Once you have the correct diner slang on the correct letters, use the wheel to translate the audio from the cassette.

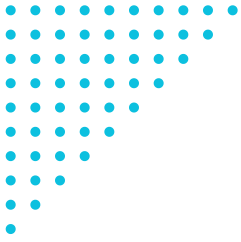

[JUKEBOX]

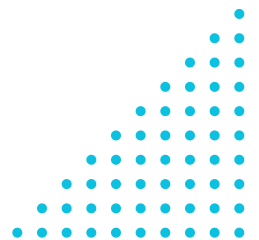

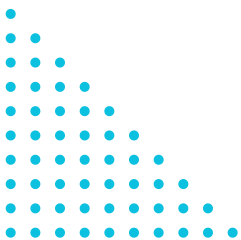

1. You will need to read the notes on the Guest Check and the suspect interviews to do this puzzle.
2. Burt Stancil mentions the total amount of time you need for all four songs. Lindsay Rogers mentions one of the songs you need. So now you just need to find three more.
3. You are looking for four songs whose total time equals 10 minutes and 30 seconds. You can subtract 3:20 from the time since you know one of the songs. This means you need three songs whose total time equals 7 minutes and 10 seconds. Remember that 60 seconds equals 1 minute.

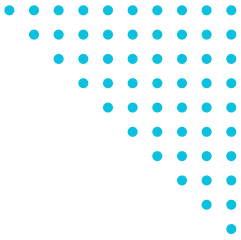

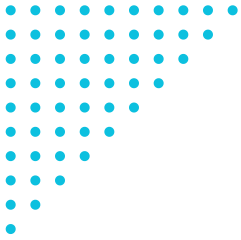

[KIDS MENU]

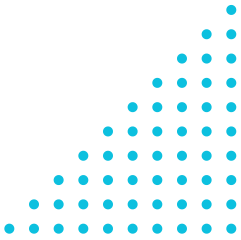

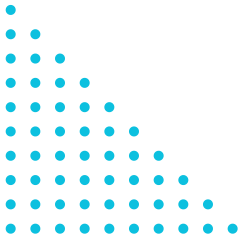

1. Use the back side of the business card with the back of the kid's menu.
2. Use the pairs of letters (the ones in parentheses) to get a new letter. Each pair will get you one letter.
3. For example, line up the card so that the 1 is by W and the 2 is by H. The arrow on the card should point to the letter you need, in this case, the letter F. Do this for all the pairs. You will end up with two words

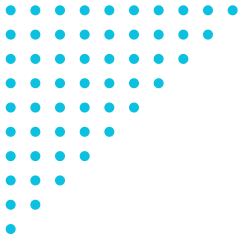

[USB/FLASH DRIVE]

1. You will need to have solved and unlocked the three QR codes from the Will Street notes before you can unlock this.
2. You will get numbers from each unlock.
3. Use the order the QR codes are in.

[SOLUTION]

1. You will need to have unlocked and solved everything else before you can do this.
2. Read the information in the unlock to figure out who killed Waylon.
3. The comments about fingernails and height should clue you in on who the killer is.
