# DJ

1. DJ Millennium gives you the information you need for the playlist. He mentions the total time of the playlist was 24:27. He also mentions three of the seven songs on the playlist. Take the total times of those songs and subtract that time from 24:27. Remember, seconds aren't decimals.
2. This will leave you with 13:32. You're looking for four songs that would equal 13:32. Once you have figured it out, use all seven songs that make up the playlist and give them to the DJ.
3. If you have trouble finding the remaining four songs you need, start with the shortest songs.

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
MNOPQRSTUVWXYZABCDEFGHIJKL

You will now be able to decode the text. It starts with “eat...”

Look at the movie list and see if there is a common element for each year.
2. The same triangle shows up in the background nine times. Each one is pointing to a movie. These are the fan favorites.
