PHRENOLOGY / AUDIO TAPE PUZZLE

Solution: "OPEN WITH VOLTAGE"

Transcript from Tape:

I am starting to fear that the loss of so many subjects is going to bring about some undue attention. The latest round of experiments is yielding some positive results, I believe. I am conducting an experiment now. I intend to begin hiding my findings; I can't run the risk of them being found until my work is done. In the event something happens to me, the ideal patient can help. The ideal patient should be one who is in tune, can imitate, is of a certain size, and values friendship. They should also be mirthful and amative with spirituality, and they need to be secretive. Finally, the ideal patient will display vitality, be in tune, be agreeable, spiritual, display good continuity, have a good appetite, and be of good size.

SUSPECT ELIMINATIONS

Kya Carney - Eliminated by Susan's pop-it and card puzzle.

Fergus Nolan - Eliminated by Joseph's math puzzle.

Eva Boone - Eliminated using her distaste for smoking and the fact that someone had been smoking in the hidden room recently. The trash can contains the evidence of smoking.

Isaac Hickman - Eliminated by the x-ray found in the locked filing cabinet that indicates the person is married (wedding ring on left hand).
