

MURDER AT THE MOVIES - EPISODE 3

HINT FILES

*One Puzzle Per Page

Table of Contents

Page

2. Groupings of numbers and letters (8-4-3...)
3. Four rows of letters
4. Chill with us
5. "Answer this..."
6. Four columns of numbers with symbols
7. Solution

GROUPINGS OF NUMBERS AND LETTERS (8-4-3...)

1. The key to decode this can be found in materials from an earlier episode.
2. You should find numbers above letters on multiple documents.
3. Once you know what letter options are available for each number, look and see what combinations form words.
4. Once you have decoded the message, you will need to reference documents from an earlier episode to know which suspect is being referenced.

FOUR ROWS OF LETTERS

1. Pay attention to the symbols at the beginning of each row. What word does each symbol represent? Have you seen those words referenced somewhere else?
2. Look at the Elementals promotional paper.
3. There are four words on the Elementals promotional paper that correspond to symbols on the four rows of letters paper. Put the row of letters in stacked order according to the order on the Elementals promotional paper. This should reveal a message for you.

CHILL WITH US

1. Notice that each of the top three popsicles have a sequence of letters on them.
2. Notice the smaller popsicles in the middle of the flyer and what they are doing.
3. What items do you have that could connect to this flyer?
4. The sequence of letters from the top three popsicles, have you seen those sequences anywhere else?
5. Take a look at the grid of letters.
6. Using the popsicle sticks you have, arrange them on the grid of letters covering up each sequence of letters.
7. For example, the first popsicle has the sequence of letters of $M \rightarrow X \rightarrow M$. Using a popsicle stick, find the sequence of letters on the grid and lay the popsicle stick over the entire sequence. Do this for the other sequences of letters on the other popsicle sticks.
8. Once all sequences of letters are covered, read the letters you have still showing.

“ANSWER THIS...”

1. You are told to solve the riddle and the answer to that will give you the key.

This clues you in to the fact that this is a keyword cipher.

2. If you are having trouble solving the riddle, the answer is one of the four elementals.

3. Once you know the answer to the riddle, to create the key to the cipher you need to write the answer on one line followed by the rest of the alphabet (omitting any letters from the answer) on the same line. After doing this, directly underneath this string of letters on a second line write the alphabet completely a through z. You now have your key to decode the message.

FOUR COLUMNS OF NUMBERS WITH SYMBOLS

1. You will need something from an earlier episode to solve this.
2. There is a document that has pirate ships and rows of letters. Notice the symbols on different pirate ships are the same as some of the symbols used here.
3. Find the correct pirate ships and count down the number of letters in their columns to identify the correct letter.

SOLUTION

1. Solving each puzzle will provide you with information on a person who is a part of the pact and why they are.
