SILVERSTONE'S CHALLENGE

The Amazing Silverstone once set up a magical challenge for his apprentice. He gave his apprentice five colored orbs – purple, blue, orange, green, yellow – to arrange in a specific pattern. Each orb possessed unique magic, and it was up to the apprentice to determine the correct order to unlock the hidden powers within.

Silverstone's clues for the order were as follows:

1. The blue orb must be placed directly to the left of the yellow orb.
2. The purple orb cannot be placed next to the orange, green or yellow orbs.
3. The orange orb must be placed to the right of the green orb.
4. The yellow orb cannot be placed directly at the far left or far right of the order.

Can you solve the challenge that Silverstone once created for his apprentice?
