*One puzzle per page.

Number of Days Left of Food and Water

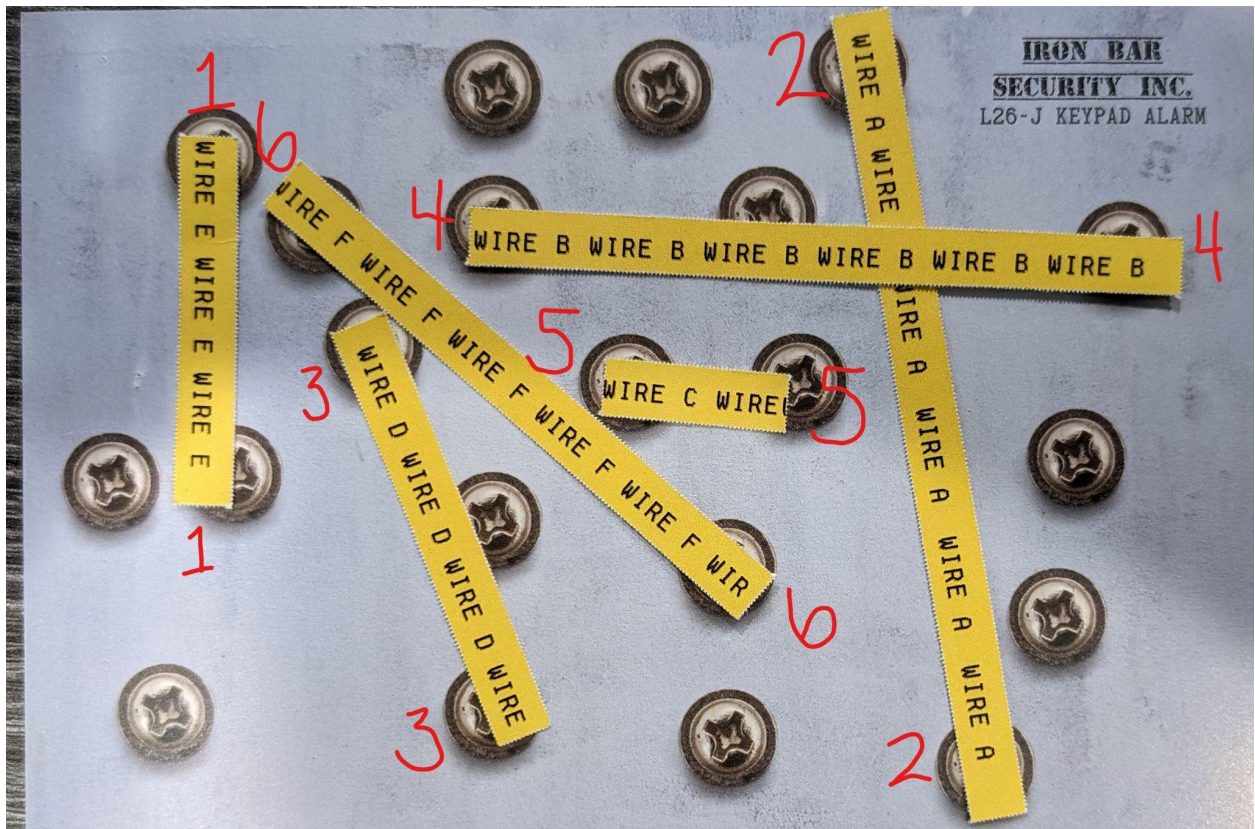

Solution: three

30 days of food and water were left on March 19, after the victim had eaten. So, starting on April 20, count 30 days forward. This will get you to April 18.

Inside the funeral program, it mentions that Richard died on April 1. Based on the information in the Beginning Brief (“twelve days after Chalmers’ death” and “three days after the sale concluded”) this would mean the investigation took place on April 16. ($1 + 12 + 3 = 16$). Since Larry mentions “counting today” when figuring out how many days of food and water the victim has left, that will give you three days (16th, 17th, and 18th).

Wire Puzzle

Solution: eadbcf

Estate Sale Tag

Solution: 6watkins

Anthony Watkins bought lot #6 which contained the jewelry box.

Cigars

Order from the closet:

Brannon Bros.

Irving

Crown

Poirot

Colors in corrected order from cigar box:

Black, Green, Red, Blue

Paintings

Solution: Down, Left, Left, Up

Desk

Solution: downleftleftup

Who is the Fifth Victim

Solution: Melinda

Coat of Arms/Taped Note Puzzle

My brush a razor

My canvas flesh

M ← HEWJΣWT
