Miami Postcard Puzzle Unlock

3. Determine how many spaces are between each letter in the sequence and use that information to figure out what the missing letter is.
4. Convert the letters back into symbols.
5. You will use this after you have found 4 bodies.

Storage Unit 15 Unlock

1. Notice that on the Will Street FB Page there is a list detailing who rented each storage unit. Storage Unit 15 is rented by Mia Adirof. When you look at this you can see that Adirof is Florida spelled backwards and Mia is short for Miami. This connects the Miami postcard with storage unit #15.
2. As you unlock different locations you find some of The Collector's alphabet symbols in addition to extra symbols with plus and minus. These extra symbols connect with the potential victim cards to show you which victim that you just located. The alphabet symbols match up with the symbols that you solved for on the Miami postcard.
3. If you also notice that each victim's card has a number on it – it might be an id number or a street address. Now, you need to put the victims in the correct order according to the symbol found at their location and according to the order given to you on the Miami postcard. Once you have the correct order, solve the equation using the numbers from the victim cards and you will have code to access storage unit #15.
4. The number you end up with is three digits

Final Solution

1. When you unlock Storage Unit 15 there are more of The Collector alphabet symbols that have been left. The flame symbol you should have seen somewhere else before.
2. You will also notice a flame that matches the flame on the cat birthday card.
3. Decode the symbols at the bottom.
4. Notice which letters are marked out on the cat birthday card and mark those letters out from the symbols that you just decoded and see what you are left with.
