How Each Suspect Is Eliminated

Emma Ravenwood is eliminated from the interview report with the bartender. He states that he saw the one who casts spells at a table with someone else and they were both there until after 10:00. We know that Emma is the one who cast spells based on her interview.

Sandra Shadwell is revealed to be the person meeting with Emma Ravenwood once you solve the healing spell puzzle. Since they were both there until after 10:00 it couldn't be Sandra.

Cecil Barlow is eliminated as a suspect because he has a show at 9:30 and thus could not be the killer.

Eleanor Silverstone is eliminated as a suspect when you solve the spiral puzzle. You find out that Eleanor is receiving alimony from Nathaniel Silverstone, but that will stop if he dies. So Eleanor will lose a lot of money when Silverstone dies and thus doesn't have a motive to kill him.

Drake McNabb is handicapped. You find this out when you solve the rail cipher and Silverstone apologizes for Drake ending up in a wheelchair. This information paired the eyewitness interview, which states seeing a person chasing a dog through the woods while carrying something, eliminates Drake.

Norman Hardy is eliminated by the clue you get from Charlie Mavown about which clause in the legal document to look at. Once you do that you find out that Hardy will lose all of his money from the sale of the magic kits if Silverstone is dead. So Norman doesn't have a motive to kill Silverstone.

Gunther Deville is eliminated from the ILLVMINATIO puzzle and the letter in the trash. From these you find out that Gunther has some big gambling debts and that Silverstone paid off his debts. Since Gunther knows this it is unlikely that he would kill Silverstone.

Maxwell La Croix is eliminated from the card he is given and the playing card puzzle which reveals a meeting to inducted Maxwell into the Order of the Left Hand at 9:30 and thus eliminating him as a suspect.

Gregor Edmonton is discovered to be in the advanced stage of cancer and has a lack of mobility. This information paired the eyewitness interview, which states seeing a person chasing a dog through the woods while carrying something, eliminates Gregor. Gregor can also be eliminated through the card puzzle that is given to Maxwell which reveals a meeting to inducted Maxwell into the Order of the Left Hand at 9:30 and since the card is from Gregor you can assume he is there as well.
