# #1 From Notebook

Solution: Rich Botanical Gardens

# #2 from Notebook/Blue Door

Solution: 2667

1. You are asked for the following:
2. -Victims with more than one eye. This means actual eyes, not eye sockets. There are only two people shown with more than one eye.
3. -Single eyes and open flames. Again, eyes not eye sockets. There are three single eyes shown in the frames and three flames on the fingers of the hand. This gives you 6 for the second number.
4. -Half the amount of vacant human eye sockets. There are 5 skulls with two sockets each in one photo (the broken skull should be excluded from the count since it doesn't show any eye sockets) and one skull with two sockets in another photo. This gives you a total number of 12 vacant human eye sockets. Take the total number of eye sockets and divide by 2. That gives you 6 for the third number.
5. -Total number of eyes and sockets (human or otherwise). Use last digit only. If you count the eyes and sockets of the skulls, the pumpkins, the doll heads, the victims, and count the single eyes as well you will get a two digit total of 47. Use the second digit of that number which is 7.

# Behind Blue Door

Solution: Devil in Disguise (word you will use is devil)

# Computer Unlock

Solution: richdevil

# #3 in Notebook

Solution: chesherd

# Red Door Unlock

Solution: kill

# Fetal Pig

Solution: cheshirerdprey

Cheshire Rd is taken from puzzle #3 in the notebook and prey is taken from the video behind the red door.

# Victim 1 (Heart Locket)

Solution: With Love From Mr. Xavier

# Victim 2 (Bracelet)

Solution: Member Number Two Three Four Eight

# Victim 3 (Back of Watch)

Solution: I have enjoyed our times together Sara. From Alistair.

# Victim 4 (Beads)

Solution: Pw is agony

# VFPD Computer:

Solution: fire

Victim 5/What is This Victim's  
Last Name?

Solution: westerhouse

# Cerberus Club Card

Password to gain access (part 1): agony

Password to get past Ellsworth (part 2): aex2348

# Medical Drawing #1

Solution: letter

# Medical Drawing #2

Solution: after

# Medical Drawing #3

Solution: 20 which corresponds to the letter t

# Butterfly Bookmark

Solution: you

The 3 medical puzzles say: letter after T (which is u). Alistair tells you to spell out what you find. So u spelled out would be 'you.'

# Chessboard

Solution: headache

# Telephone

Solution: 85141385

# Solution Card

Solution: davidyork
