How to Eliminate Each Suspect.

Amos Owen - The solution to the postcard puzzle eliminates Owen.

Quinton Garland - The info in Benjamin's email eliminates Garland as a suspect since he was on Gold Hook Island during the times of the murders (proven by the ankle monitor records) and some of the murders happened on the mainland. You know that Garland is the one with the ankle monitor based on context clues in his interview and info in the email.

Knox Richmond - You find out the killer is using slipknots to kill his victims from the Case Notes, page "About the Strangler." You then examine the knots diagram card to find out what slipknots look like. You then examine the card with ropes, 6 symbols (one for each suspect), and 3 knots under each symbol. The lighthouse is the only place that does not use slipknots. So this eliminates Richmond since he works at the lighthouse..

Kara Perkins - Perkins is proven innocent by the file you get in the email from the Scions of Independence. Albert Pikes states that Kara was with him at the time of Darby and Madge's murders.

Abigail Conrad - Conrad is eliminated by using the timeline Justin writes out on the notepad and the map. If followed correctly you find that Justin ends up at the Tiki Torch during the storm. Abigail Conrad is stated to be dry so she can't be the one that killed Sherm Sullivan since the killer would have gotten soaked being out in the storm.
