

# Copycat: Solution File

1 puzzle per page

# Black Rock Butcher Note #1 (once upon a time):

Message gained by extracting extra letters: all it takes is one right decision

Decoded message: Not bees one two or three, scratch eight seven and thirteen, add what's left and that suspect set free.

# The Toymaker Puzzle (yellow tag with bee):

Answer: 9

Use with map.

This eliminates Wallace Hammett as a suspect since location 9 is the police station and he works there.

(use the solution from the Black Rock Butcher Note #1 (once upon a time) with the Bee tag to solve)

# Butcher Note #2 (Sometimes you fall in love...):

Answer: Would Equine Equals Millie

Play on Words Version: Wood Horse Is Millie (refers to woodenhorse83)

This eliminates Amelia (Millie) as a suspect since she was hacking the Valley Falls PD during the time of one of the murders.

# Toymaker puzzle #2 (Green tag, multiple fonts):

Solution: GLASSES DNAXXRH, TATTOO DNAXXLH

XX refers to DNA makeup/female sex chromosomes. Gives information about two female subjects.

This tells you that Amelia is right-handed and Raven Blake is left-handed. We know from Clinton Pierce's interview (given on Jasmine Sands' page) that the killer is right-handed. While this does not prove that Amelia is the killer since there are several right-handed people among the suspects, it does help us eliminate Raven.

# The Seaside Strangler Notes:

Solution: Harris Attended Unmasked

This lets you eliminate Justin Harris as a suspect since this event coincides with one of the murders.

# Chimera Note (Detective Notes):

Solution: private

# Investigation Board:

Solution: I am not an observer.

This lets you eliminate Dexter Greeley since he works at the Valley Falls *Observer*.

# Final Solution

Solution: mitchellprivate
